

Cable Management System

CM15XXX

Build Your Own Cable Management System

Our Cable Management System is designed to easily handle any cable type. The system will improve polishing results by minimizing the effects of cable weight and distortion on the polishing fixture. The customizable components can be interchanged for various cable applications. The systems components are engineered and manufactured to Domaille's high visual and quality standards.

Half Plates customizable

Benefits at a Glance:

- Customizable system easily adjusts to any cable length or rigidity
- Designed to move the cable assembly with the fixture
- Minimizes distortion caused by cable movement
- Mounts to any existing Domaille brand polishing machine with fixture
- Configure to your requirements by adding customizable components as your needs grow
- Manufactured to Domaille's exacting quality standard
- Micro-G compatible options available
