ABRASAVE® TMT-EZR Fixture Line

PFH-TMT-EZR8-48

Designed for Maximum Efficiency

The MT-EZR Rapid Clamp from Domaille Engineering is specially designed to reduce loading time, while minimizing protrusion height variation, maximizing yields and extending polishing film life. The MT-EZR Rapid Clamp system is designed around our patented MT-EZ clamp that has 15+ years of proven excellence, which has been incorporated into the 12, 24, 30, and 48 Port AbraSave® TMT Polishing Fixtures.

Benefits at a Glance:

- 48 ferrules per batch to maximize throughput
- Rapid clamp actuation for maximum efficiency
- Visual indication of clamp engagement
- No tools to locate, maintain or replace for an instant cost savings
- Reduced operator fatigue
- Designed to minimize protrusion height variation in TMT connector polishing
- Patented MT-EZR clamp system
- Patent-pending TMT-EZR latch system
- Circumferential clamping surface on ferrules eliminating clamping distortion
- Cable management ready for quick add on capabilities to further support cables
