

Gold Series Precision Rubber Pads

P/N PM12101-XX & PM12101-XXL
PM12108-XXL

The finest Rubber Pad in the marketplace!

Domaille Engineering's Gold Series line of precision rubber pads used for polishing optical fiber connectors are specially designed to control process variation. They feature actual durometer readings, durometer range of ± 2 (Shore A), color coding for visual identification, Dry Grab high glass non-slip surface for adhering abrasive film, precision ground to .02mm tolerance serialized and date coded for data tracking.

Available in 5" and 8" options

Benefits at a Glance:

- Actual known durometer for consistent polishing results
- Precision ± 2 durometer ranges
- Dry Grab high gloss anti-slip surface for positive abrasive film adherence
- Actual durometer documented on pad
- Color coded, serialized and date stamped for visual identification and data tracking
- Locking or standard models
- 5" and 8" diameter sizes available in 40-95 durometer increments
